Automation Tester with hands-on experience in Python, Selenium, and Playwright. Skilled in designing and executing test scenarios, identifying defects, and improving test coverage for web applications. Experienced in building structured test frameworks using Page Object Model (POM) and managing multiple user roles and workflows. Strong understanding of QA processes with a focus on reliability, maintainability, and real-world test automation.

Experience

SEPTEMBER 2024 - PRESENT

ALOVSOFT, BAKU - Quality Assurance Tester

- Designed and executed end-to-end, system, and functional test scenarios for web applications
- Built and maintained test automation framework using Python and Selenium
- Generated Allure and HTML test reports for test execution and defect tracking
- Created and maintained test plans, test suites, and test cases
- Defined and executed smoke, regression, and sanity test suites
- Collaborated with developers to identify, report, and track defects, improving overall product quality

JANUARY 2024 - SEPTEMBER 2024

Freelancer, BAKU - Quality Assurance Tester, Customer Service Analyst

- Performed UI/UX and cross-browser testing across multiple environments
- Participated in User Acceptance Testing (UAT) with stakeholders
- Conducted manual API testing using Postman
- Supported regression testing by identifying and structuring critical test cases
- Performed beta testing and mobile testing (Android)
- Acted as a bridge between users and technical teams, improving issue resolution flow

MAY 2022 - JANUARY 2024

Freelancer, Remote - Quality Assurance Tester.

- Executed manual testing for platforms including Revolut, IDEMIA, and Airbnb

- Performed UI/UX, exploratory, and cross-browser testing on web and mobile (iOS & Android)
- Increased user engagement by 25% on an e-commerce platform by identifying usability issues and defects
- Worked with Agile (Scrum, Kanban) methodologies in distributed teams
- Used JIRA and Confluence for bug tracking and documentation
- Contributed to regression test planning by identifying high-risk test scenarios

SEPTEMBER 2021 - MAY 2022

TIKA, Baku – Junior QA

- Conducted functional, UI, and localization testing
- Created mind maps and checklists to improve test coverage and task breakdown
- Worked in Agile/Scrum environment to ensure efficient delivery
- Performed cross-browser and usability testing

SEPTEMBER 2020 - SEPTEMBER 2021

ORIENT ITM – Help Desk

- Provided L1/L2 technical support for enterprise users
- Diagnosed and resolved hardware/software issues
- Managed incident tracking and escalation workflows
- Maintained system reliability, backups, and security processes
- Supported network and server infrastructure troubleshooting

Soft Skills

- Adaptability
- Stress Management
- Strong Focus and Concentration
- Eager to learn new tools and tech
- Prompt Engineering

Technical Skills

- Languages: Python, PowerShell, MySQL.
- Frameworks: Django, Selenium, Allure, Pytest
- API : Postman
- Version Control: Git, GitHub.
- Test Management Tools: JIRA, TestRail, Trello, Confluence.
- GitHub Actions: CI .yaml files for continuous integration

Education

SEPTEMBER 2012 - JULY 2016

Baku State University - *Bachelor*

Hold a degree in Mathematics. My academic background has equipped me with proficiency in Advanced Calculus, Linear Algebra, Abstract Algebra, Probability and Statistics, and Differential Equations.

Certification

UDEMY - Software Testing Masterclass

UDEMY - Selenium Automation with Python

UDEMY - Automated Software Testing

LinkedIn - Test Automation Foundation
